List of Figures	xv
Preface	xvii
Acknowledgments	xix
1 ORGANIZATION IN HUMAN ENDEAVORS	1
Is There a Basic Human Need to Organize?	1
Why Do We Need to Organize?	2
Why Do We Need to Organize Information?	2
What Is Organization of Recorded Information?	2
How Is the Organization of Information Approached in Different Environments?	6
Libraries	6
Archives	8
Museums and Art Galleries	9
The Internet	11
Data Administration and Office Environments	13
Conclusion	14
Notes	14
Suggested Readings	15
Organization of Information in Libraries	15
Organization of Information in Archives/Manuscripts	15
Organization of Information in Museums/Art Galleries	15
Organization of Information in the Internet	15
Organization of Information in Data Administration	16
Offices	16
Data Modeling	16

2	Retrieval Tools	17
	Why Do We Need Retrieval Tools?	17
	What Are the Basic Retrieval Tools, Their Formats, and Their Functions?	18
	Bibliographies	18
	Catalogs.	20
	Purposes of Catalogs.	21
	Forms of Catalogs	23
	Arrangements Within Catalogs	25
	Indexes	27
	Finding Aids	29
	Registers	31
	Databases	31
	Bibliographic Utilities	31
	Conclusion	33
	Notes	33
	Suggested Readings	34
3	Development of the Organization of Recorded Information in Western Civilization	37
	Inventories, Bibliographies, Catalogs, and Codification.	37
	Antiquity	37
	Middle Ages	39
	European Renaissance	40
	From Inventories to Collocating Devices	41
	Period of Codification	43
	Twentieth Century	45
	Description	45
	Subject Access	46
	Verbal Subject Access	46
	Classification	47
	Special Materials	48
	Archives	48
	Museums and Art Galleries	49
	Subject Access to Special Materials	49
	Mechanization of Bibliography	50
	The Documentation Movement	50
	Library Automation	52
	Conclusion	52
	Notes	53
	Suggested Readings	54

4	Encoding Standards	57
	How Do We Encode Records?	57
	Why Do We Encode Records?	58
	What Are Examples of Standards for Coding Records That Are Currently in Use?	58
	MARC (MACHINE READABLE CATALOGING)	59
	USMARC	63
	UNIMARC	64
	SGML (Standard Generalized Markup Language)	65
	DTD (Document Type Definition)	65
	XML (Extensible Markup Language)	73
	Warwick Framework	73
	Conclusion	74
	Notes	74
	Suggested Readings	75
5	Metadata: Description	77
	What Is a Bibliographic/Surrogate/Metadata Record?	78
	How Are Surrogate Records Created?	78
	ISBD (International Standard Bibliographic Description)	80
	<i>Anglo-American Cataloguing Rules, Second Edition,</i> <i>1988 revision (AACR2r)</i>	82
	Archival <i>APPM (Archives, Personal Papers, and</i> <i>Manuscripts)</i> Records	85
	TEI (Text Encoding Initiative) Headers	86
	The Dublin Core	87
	GILS (Government Information Locator Service) Records	89
	FGDC (Federal Geographic Data Committee) <i>Content</i> <i>Standard for Digital Geospatial Metadata</i>	93
	VRA (Visual Resources Association) Core Categories for Visual Resources	93
	EAD (Encoded Archival Description)	94
	Crosswalks	95
	Index Records	95
	On-the-Fly Records	95
	Museum Accession Records	97
	How Does the Environment Affect the Way a Surrogate Record Is Created?	97
	Conclusion	97
	Notes	98
	Suggested Readings	99

6	Metadata: Access and Access Control	103
	Choice of Access Points	104
	Primary Access Point	104
	Main Entry Controversy	106
	Justification for Main Entry	107
	AACR2 Principles for Choosing Main Entry	114
	Additional Access Points	117
	Access (Authority) Control	117
	Headings for Access Points	119
	Principles for Choice of Personal Name	120
	Principles for Form of Personal Name	121
	Principles for Entry Word and Remaining Structure of Personal Name	122
	Principles for Choice of Corporate Name	123
	Principles for Entry Word and Form of Heading for Corporate Names	124
	Principles for Choice of Uniform Title	125
	Principles for Arrangement of Uniform Titles	125
	International Access (Authority) Control	126
	Conclusion	128
	Notes	128
	Suggested Readings	129
7	Verbal Subject Analysis	131
	Subject Analysis Process	132
	Exhaustivity	135
	Identification of Concepts	137
	Topics Used As Subject Concepts	137
	Names Used As Subject Concepts	140
	Chronological Elements As Subject Concepts	141
	The Concept of Form As Subject	142
	Translating Concepts into Index Terms	143
	Controlled Vocabulary	143
	Controlled Vocabulary Problems	144
	Specific vs. General	145
	Synonymous Concepts	145
	Word Form for One-word Terms	145
	Sequence and Form for Multiword Terms and Phrases	146
	Homographs and Homophones	147
	Qualification of Terms	147

Abbreviations and Acronyms	148
Popular vs. Technical.	148
Subdivision of Terms.	148
Precoordination vs. Postcoordination	149
General Principles for Applying Controlled Vocabulary	
Terms	149
Literary Warrant	149
Specific Entry	150
Direct Entry.	150
Number of Terms Assigned	151
Concept Not in Controlled Vocabulary	151
Index Terms for Names	151
Kinds of Controlled Vocabularies	151
Subject Heading Lists	152
Thesauri	156
Natural Language Processing (NLP)	158
Ontologies.	160
Keywords	163
<i>WordNet</i> [®]	164
Conclusion.	166
Notes.	167
Suggested Readings	169
<i>LCSH</i>	170
<i>Sears</i>	170
<i>MeSH</i>	170
<i>AAT</i>	171
ERIC	171
NLP and Ontologies	171
8 Classification	173
Classification Theory	174
Classical Theory of Categories	174
Prototype Theory	176
Hierarchical, Enumerative, and Faceted Classifications	176
Classification Schemes.	181
Classification Concepts	181
Broad vs. Close Classification.	182
Classification of Knowledge vs. Classification of a Particular Collection	183
Integrity of Numbers vs. Keeping Pace with Knowledge	184
Fixed vs. Relative Location	185

8 Classification (continued)

Classification Concepts (<i>continued</i>)	
Closed vs. Open Stacks	186
Location Device vs. Collocation Device	187
Classification of Serials vs. Alphabetic Order of Serials	187
Classification of Monographic Series	189
Classification of the Internet	189
Artificial Neural Networks (ANNs)	192
Conclusion	194
Notes	194
Suggested Readings	195
Classification in General	195
Specific Classification Schemes	196
Dewey Decimal Classification	196
LC Classification	197
Universal Decimal Classification	197
Colon Classification	197
Other	197
Classification and the Internet	198
Artificial Neural Networks (ANN)	198

9 Arrangement and Display 199

Arrangement of Physical Information Packages	199
Libraries	199
Archives	201
Arrangement of Intangible Information Packages	202
Arrangement of Surrogates (Metadata)	203
Filing History	203
General Rules for Arrangement	204
Filing/Display Dilemmas	206
Conclusion	208
Notes	209
Suggested Readings	209
Arrangement of Information-Bearing Entities	209
Libraries	209
Archives	210
Internet	210
Arrangement of Bibliographic/Surrogate Records	210

10 System Design.	211
How Does System Design Relate to the Organization of Information?	211
How Can Existing Systems Be Used and Interpreted Effectively?	212
What Suggestions for Improving Current Systems and What New Systems Have Been Proposed for the Organization of Information?	219
Standard Interfaces and Z39.50	220
Labels and Brief Displays	221
Exploitation of MARC	222
Browsing	222
Spelling Correction	223
Controlled Vocabulary and Classification	223
Conclusion.	224
Notes.	224
Suggested Readings	225
 Conclusion	 227
Notes.	228
 Appendix: Subject Analysis Application	 229
Glossary	233
Index	255
