

# Contents

<b>1</b>	<b>Overview</b> . . . . .	1
1.1	Introduction . . . . .	1
1.2	The Problem . . . . .	2
1.3	Success and Measuring it . . . . .	3
1.3.1	Relevance . . . . .	4
1.3.2	Precision . . . . .	4
1.3.3	Recall . . . . .	5
1.3.4	Some Qualifications . . . . .	5
1.4	Searching, Browsing and Berrypicking . . . . .	6
1.5	Refining Information Retrieval Tools . . . . .	8
1.6	Functional Bibliography . . . . .	9
1.7	Surrogates, Aliases and the Pernicious Effects of Physicality . . . . .	15
1.8	The Problem Re-Stated and a Thesis . . . . .	18
1.9	How is Information Going to be Organized? . . . . .	18
1.10	Learning From Failure . . . . .	20
	References . . . . .	22
<b>2</b>	<b>Some Useful Ideas and Background Theories</b> . . . . .	25
2.1	Reid on Abstraction and Classification . . . . .	25
2.2	Ontologies, Gerrymanders, Natural Kinds and Taxonomies . . . . .	27
2.3	Concrete Objects and Abstractions . . . . .	29
2.4	Entities, Properties and Statements . . . . .	31
2.5	The Triangle of Meaning . . . . .	32
2.6	Identifier Mappings . . . . .	35
2.7	Graph Theory . . . . .	36
2.7.1	Triple Stores . . . . .	39
2.8	Elementary Data Structures and Their Algorithms . . . . .	40
2.8.1	Lists and Strings . . . . .	41

2.8.2	The Alphabetical List: The 'Wheel' of Information Retrieval . . . . .	42
2.8.3	Association Lists . . . . .	44
2.8.4	Filing Order and Key Syntax . . . . .	45
2.8.5	Precoordination and Postcoordination . . . . .	49
2.8.6	Hashing and Key Jumping . . . . .	52
2.8.7	Metadata . . . . .	53
2.8.8	Trees, Hierarchies, Forests and DAGs . . . . .	54
2.8.9	Converting an Ordered Tree to a List . . . . .	60
2.8.10	Tables, Citation Order, Filing Order . . . . .	62
2.9	Roget's Thesaurus . . . . .	65
2.10	The Dewey Relativ Index . . . . .	68
2.11	Tables of Contents and Back-of-the-Book Indexes . . . . .	69
2.12	More on Back-of-the-Book Indexes . . . . .	72
2.13	Themes, Aboutness, Subjects and Polytopy . . . . .	74
2.14	Tag, Concept and Topic Annotation Languages . . . . .	76
2.14.1	Free and Controlled Vocabularies . . . . .	78
2.14.2	Information Retrieval Thesauri . . . . .	80
2.14.3	Tidying up the Nomenclature of Tags and Topics . . . . .	81
2.15	The Lesson of the Museum and its Written Guides . . . . .	82
	References . . . . .	83
<b>3</b>	<b>Catalogs, Inventories and Propaediads . . . . .</b>	<b>87</b>
3.1	Introduction . . . . .	87
3.2	(Peirce)Types vs. Tokens . . . . .	89
3.3	Plato on Universals vs. Particulars . . . . .	90
3.4	Aristotle . . . . .	92
3.4.1	Predicables and Definition . . . . .	93
3.4.2	The Ontological Square . . . . .	94
3.4.3	Classification . . . . .	97
3.5	Continuants and Occurrents . . . . .	97
3.6	Higher Order Properties or 'Metaproperties' . . . . .	99
3.7	Francis Bacon and Trees of Knowledge . . . . .	101
3.8	The Organization of Encyclopaedias . . . . .	103
3.9	Mortimer Adler and Propaediads . . . . .	113
3.10	Catalogs vs. Propaediads . . . . .	116
	References . . . . .	118
<b>4</b>	<b>A Logic for Organizing Information . . . . .</b>	<b>121</b>
4.1	First Order Logic . . . . .	121
4.2	Symbolizing Attributes, Concepts or Types . . . . .	123
4.2.1	Symbolizing Aspects (and More) . . . . .	125
4.2.2	Symbolizing 'Subjects': Nouns and Modifiers . . . . .	127
4.2.3	Symbolizing Annotated Types . . . . .	131

4.3	A Logic for Classification . . . . .	132
4.4	More on the Features of Conditions for Classification . . . . .	139
4.4.1	Necessary and Sufficient Conditions. . . . .	139
4.4.2	Essential Properties and Natural Kinds . . . . .	140
4.4.3	Determinate and Indeterminate Properties . . . . .	140
4.4.4	Fallibility, Labeling Specimens, Violating Taxonomic Constraints . . . . .	141
4.4.5	Exclusive and Exhaustive Properties (JEPD) . . . . .	142
4.4.6	Some Common Conditions in the Context of IOs . . . . .	143
4.5	Classification of Things and Topic Classification of IOs. . . . .	144
4.5.1	To Clone Topic Annotations or Not? . . . . .	146
4.6	Structured Types for Topics: Ranganathan's Heritage. . . . .	149
4.7	Splitting or Clumping: Parts and Wholes: Mereology: Structure . . . . .	153
4.8	DAGs of Topics . . . . .	155
4.8.1	Links from Taxonomies and Quasi-Taxonomies . . . . .	156
4.8.2	Links from Logic . . . . .	157
4.8.3	Parameterized Topics and Links . . . . .	157
4.8.4	Links from Outside Propaedias . . . . .	158
4.8.5	Mereological and Other Links . . . . .	159
4.9	Polytopicality and Subject Vectors. . . . .	159
	References . . . . .	161
<b>5</b>	<b>Classification . . . . .</b>	<b>165</b>
5.1	Introduction. . . . .	165
5.2	Aristotelian-Linnaean Classification . . . . .	165
5.3	Revisable Aristotelian. . . . .	172
5.4	Librarian Aristotelian . . . . .	175
5.5	Polyhierarchies . . . . .	178
5.6	Basic Synthetic Classification . . . . .	180
5.7	Ersatz Facets . . . . .	182
5.8	Examples of Traditional Librarian Classifications . . . . .	184
5.8.1	Dewey Decimal Classification. . . . .	185
5.8.2	Colon Classification . . . . .	187
5.9	Heterogeneous Classification Using Higher Order Types . . . . .	190
	References . . . . .	192
<b>6</b>	<b>Topic Annotation . . . . .</b>	<b>195</b>
6.1	Indexing Languages . . . . .	195
6.2	Canonical Identification of Topics: 'Notation' . . . . .	196
6.3	Named Entities, 'Fido'-Fido . . . . .	197
6.4	Classical Enumerated Subject Heading Lists . . . . .	198
6.4.1	An Example: Library of Congress Subject Headings (LCSH). . . . .	200

6.5	Synthetic Annotations . . . . .	204
6.5.1	An Example of a Synthetic Subject Heading List. . . . .	206
6.6	Facets . . . . .	207
6.6.1	Real Faceted Topics . . . . .	207
6.6.2	Orthogonal Facets and Exclusive Foci? . . . . .	209
6.6.3	Facet Analysis . . . . .	212
6.6.4	Faceting and Postcoordination . . . . .	215
6.6.5	Relationships and Further Synthesis . . . . .	216
6.6.6	Appraising Faceted Classification. . . . .	217
6.6.7	An Example of Faceted Subject Headings: MeSH . . . . .	218
6.7	Thesauri as Annotation Languages . . . . .	220
6.7.1	WordNet . . . . .	221
6.7.2	Thesaurfacet and Classaurus . . . . .	223
	References . . . . .	225
<b>7</b>	<b>Indexing/Annotation . . . . .</b>	<b>229</b>
7.1	Introduction . . . . .	229
7.2	Evaluating Indexes . . . . .	231
7.3	How Good are Humans and Computers at Annotation? . . . . .	233
7.4	Are There Theories of Indexing? Can Indexing be Taught? . . . . .	234
7.5	The Holy Grail of Indexing. . . . .	236
7.6	Generalized Synonymy and Concept Indexing. . . . .	237
7.7	Generalized Homography . . . . .	239
7.8	Automation . . . . .	239
7.8.1	Automatic Production of Schedules . . . . .	240
7.8.2	Automatic Annotation. . . . .	241
7.8.3	Automatic Clustering . . . . .	241
	References . . . . .	242
<b>8</b>	<b>Distributed Libraries, Information and Databases . . . . .</b>	<b>245</b>
8.1	Introduction . . . . .	245
8.2	Metadata (Metacrap?) . . . . .	246
8.3	Functional Requirements for Bibliographic Records . . . . .	249
8.3.1	Group I Entities . . . . .	249
8.3.2	Group II Entities . . . . .	253
8.3.3	Group III Entities . . . . .	254
8.3.4	Relationships and Queries . . . . .	255
8.3.5	Counting FRBR Group I Entities . . . . .	257
8.3.6	FRBR Tasks . . . . .	258
8.3.7	Appraising FRBR. . . . .	258
8.3.8	What About the Digital? . . . . .	258
8.4	Knowledge Representation . . . . .	260

8.5	The Semantic Web . . . . .	262
8.5.1	Resource Description Framework and Triples . . . . .	262
8.5.2	Namespace Control and Combining Distributed Data. . . . .	264
8.5.3	The Open World Assumption . . . . .	266
8.5.4	rdf:type and rdfs:subClassOf . . . . .	267
8.5.5	Appending and Inferring . . . . .	268
8.6	Semantic Web Ontologies . . . . .	269
8.6.1	Web Ontology Language . . . . .	270
8.7	Simple Knowledge Organization System . . . . .	271
8.8	Topic Maps . . . . .	273
	References . . . . .	273
<b>9</b>	<b>Logic and the Organization of Information . . . . .</b>	<b>277</b>
9.1	Symbolization . . . . .	277
9.2	Concepts . . . . .	277
9.3	Indexing and Search . . . . .	279
9.4	Synonyms and Homographs . . . . .	279
9.5	Classification and Annotation . . . . .	280
9.6	Information Navigation . . . . .	280
9.7	Distributed IOs and Information . . . . .	281
9.8	What Logic Cannot do for Organization . . . . .	281
	References . . . . .	282
